EDUCATION

Toulouse School of Economics, France
Ph.D. in Economics (*Advisor: Ulrich Hege*) 2022–2027 (*expected*)

Kellogg School of Management, Northwestern University, United States
Visiting Ph.D. Student (*Host: Filippo Mezzanotti*) Spring 2026

Toulouse School of Economics, France
M.Sc. in Economics (with distinction) 2021–2022

Central University of Finance and Economics, Beijing, China
M.Sc. in Economics 2018–2021
B.Sc. in Economics 2014–2018

RESEARCH INTERESTS

Economics of Innovation, Corporate Finance, Intellectual Property

WORKING PAPERS

Innovation Adaptation in Knowledge Space: Evidence from Patent Eligibility Shocks (Job Market Paper)

This paper studies how innovators adapt to shocks that reduce the returns to existing knowledge. Exploiting the 2014 *Alice v. CLS Bank* decision, I show that innovators respond to weaker patent protection by recombining affected knowledge with less-exposed technologies. Technologies with greater recombination opportunities exhibit stronger adaptive responses, while firms with greater access to such opportunities are better able to sustain innovation in affected technologies and mitigate the economic consequences of the shock.

Presentations: 2025 TSE Finance Workshop; Spring 2026 Kellogg FINC Brown Bag; 2026 TPRI Research Workshop; 2026 Chicago Entrepreneurial Finance Workshop; 2026 EEA-ESEM Congress (scheduled); 2026 EARIE (scheduled); 2026 TSE PhD Student Workshop (discussant: Doh-Shin Jeon).

How Legal Remedies Drive Patent Litigation Explosions: Evidence from the *eBay* Ruling

This paper studies how changes in legal remedies affect patent litigation, using the 2006 U.S. Supreme Court decision *eBay Inc. v. MercExchange* as a policy shock. I show that limiting the availability of injunctions increased patent litigation, particularly by patent assertion entities (PAEs), by shifting dispute resolution from settlement toward court adjudication. Combining a screening model with difference-in-differences evidence, I find that litigation becomes more likely when injunctions are harder to obtain, especially against high-sales firms.

Presentations: Fall 2024 TSE Finance Workshop; 2025 Entrepreneurship and Finance (ENTFIN) Conference, PhD Session and CASCAD Session (discussant: Logan Emery).

WORK IN PROGRESS

News-Based Measures: A Count Approach

with Christian Gouriéroux, Dogukan Guney, Nour Meddahi, and Wenxuan Wang

This project develops a count-based approach to constructing news-based economic uncertainty indices using daily newspaper article counts.

SELECTED RESEARCH WORKSHOPS AND TRAINING

NBER Entrepreneurship Research Boot Camp organized by David T. Robinson and Jorge Guzman	2025
SKEMA Knowledge, Technology, and Organization (KTO) Workshop organized by Ludovic Dibiaggio and Carla Rua-Gomez; group mentored by Samina Karim	2025
Entrepreneurial Finance PhD Workshop taught by Michael Ewens, Gilles Chemla, and Jessica Jeffers	2025
PhD Summer School on Finance and Product Markets taught by Laurent Fresard and Gordon Phillips	2024

TEACHING EXPERIENCE

Teaching Assistant , Toulouse School of Economics	
<i>Intermediate Econometrics</i> (Graduate)	2025
<i>Program Evaluation</i> (Graduate)	2024–2025
<i>R Programming</i> (Graduate)	2023–2024
Teaching Assistant , Central University of Finance and Economics	
<i>Labor Economics</i> (Graduate)	2020
<i>Advanced Econometrics</i> (Graduate)	2019
<i>Dynamic Optimization</i> (Undergraduate)	2017

AWARDS AND SCHOLARSHIPS

EFA PhD Travel Grant	2025
Fondation Jean-Jacques Laffont PhD Scholarship	2022
Chinese National Scholarship (Top 0.2% nationwide)	2019

SKILLS

Software: Stata, LaTeX, Python, R
Languages: Chinese (native), English (fluent)
Interests: Cooking, Chinese calligraphy
